

Dear Photographer,

This student was born with a rare condition called Moebius syndrome that causes facial paralysis and may prevent them from having the ability to smile. Rather than asking the student to “smile” for a photograph, consider asking them to simply “Look into the camera” or count “1-2-3!” There are many ways to show expression, and people with Moebius syndrome tend to smile from the heart.

**MORE THAN A SMILE.  
MORE THAN MOEBIUS.**
